DETAILED ACTION

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 13-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Baumann USPN 5,800,471. Baumann teaches all of the features of the claims as acknowledged and discussed in applicant's specification. Applicant's stated improvement is that the method and apparatus is performed using multisite pacing with a single chamber (see applicant's specification page 2 line 28 to page 3 lines 1-10). However, the difference is not expressed in the claims and Baumann uses multi-site (inter-site) pacing for RV, LV or both chamber pacing and including atrial pacing (i.e means for pacing at a plurality of sites) as well as using different AV delay patterns for each pacing mode. Thus applicant's claim language is anticipated by Baumann. Because Baumann teaches pacing in the RV and LV chambers the examiner considers this to meet the claim language of multipacing sites in at least one chamber. It is believed that applicant meant to claim one chamber with multi-pacing sites. The "comprising" language would permit pacing sites in other chambers.

Response to Arguments

Applicant's arguments filed 5-11-2006 have been fully considered but they are not persuasive. As noted above, if applicant were to claim 1 a heart chamber having multiple pacing sites therein, the examiner would look favorably upon the claim. Such an amendment would be more commensurate in scope with what applicant is arguing.
